KEURIG®

BOLT™

Carafe
Brewing System

**The Keurig® revolution just got bigger —
a perfect pot of coffee, made simpler and
brewed faster.**

Are you frustrated with your conventional pot coffee maker — the messy grounds, burnt coffee and waiting for a fresh pot to brew? Introducing the Keurig® Bolt™ Carafe Brewing System, a commercial-grade system that delivers faster brew speed than the market-leading 120V pot coffee maker and features high quality, consumer-recognized coffee brands. The Keurig® Bolt™ system will transform the way you think about brewing a pot of coffee whether it be in a workplace, hotel or cafeteria setting.

- Convenient and easy to use
- Operationally efficient with no mess or clean up
- Fresh gourmet coffee made consistently every time

Simply place the Bolt™ pack into the brewer, press the Brew Button and enjoy a 64 oz. pot of coffee in about two minutes.

**Finally, a perfect pot of coffee with Keurig®
convenience and speed.**

The Keurig® Bolt™ system is ideal for:

Medium to Large Sized Workplaces

Busy people
Need to serve in volume
Need to do so quickly

Limited Service Restaurants

Moderate coffee business
New breakfast programs
Need for off-peak solution

Hotel and Hospitality Facilities

Featured in the lobby
Seen at the bar
Kept behind a kitchen counter

Convenience Stores

Non-traditional locations
Secondary source of coffee
Lower volume SKUs

Colleges and Universities

Kiosks
Bookstores
Academic lounges

The Keurig® Bolt™ System Advantage

Faster On-Demand Brewing Speed

The Bolt™ brewer can deliver 64 oz. of delicious coffee in about two minutes vs. four minutes or more for a leading pot (120V) coffee maker.

Consistent Quality and Taste

The sealed Bolt™ packs keep coffee grounds fresh. Since the coffee is pre-measured, your freshly brewed coffee will always have the excellent, consistent taste the Keurig® brand is known for.

Greater Convenience, Better Operating Efficiency

The Keurig® Bolt™ system uses convenient Bolt™ packs. With the ideal brewing environment inside, these packs require no pre-measuring and have no messy filters or spilled grounds to clean up.

Hot Water Dispenser

The Bolt™ Thermal Carafe

The innovative engineers at Keurig have crafted a custom Thermal Carafe, specially designed for use with the Keurig® Bolt™ brewer.

Secure Operation

The Bolt™ brewer contains a sensor system that determines when the Thermal Carafe is securely in place, the flip lid is open, and it is safe for brewing to begin. If the Thermal Carafe is removed or incorrectly inserted, the brewing process will stop immediately.

Thermal Performance

To maintain the ideal combination of taste, freshness and temperature, Keurig recommends holding coffee within the Thermal Carafe for up to one hour. The optimal temperature range for coffee taste and freshness is 175-185° F. When starting at room temperature, the Thermal Carafe will maintain this temperature range for up to one hour. When pre-heated, the Thermal Carafe will maintain this temperature range for up to two hours.

Coffee Variety Identifier

A variety identifier has been built into the handle of the Thermal Carafe so that you can specify which type of coffee it contains.

One Thermal Carafe is included with each Bolt™ brewer purchase.

Commercial Grade & Foodservice Ready

This is a rugged brewer, built to commercial specifications and UL-approved for commercial use only.

This brewer has passed extensive sanitation testing and analysis by the National Sanitation Foundation (NSF) and has an NSF-4 rating, meaning it is well suited for foodservice environments.

How The Bolt™ Pack Works

What would a Keurig® system be without an ingenious method of housing the coffee? The Bolt™ system features our new Bolt™ packs. No messy filters to deal with and no spilled grounds to clean up. Simply place the Bolt™ pack in the brewer, press the Brew Button, and a fresh 64 oz. pot of coffee will be ready for you in about two minutes. Since the sealed Bolt™ packs keep the coffee grounds fresh, you'll enjoy consistently excellent coffee time after time.

Recycling Bolt™ Pack Cups

The Keurig® Bolt™ packs' plastic cups are made from polypropylene/#5 plastic, and can be separated from the lid and filter and recycled wherever polypropylene/#5 plastics are accepted. Keurig® Bolt™ system users should check with their local municipality or waste hauler on recycling options. For more information on recycling options in U.S. communities, visit boltrecycling.com.

COOL — The Bolt™ pack is hot after brewing. Please allow it to cool.

PEEL — Carefully peel back tab to separate foil lid and filter from cup.

RECYCLE — Recycle your cup wherever #5 plastics are accepted.

Bolt™ Pack Varieties

Our company founder once said, “The best cup of coffee is the one you like best.” That’s why our brand portfolio includes leading roasters from across North America. Like members of a large, extended family, all of them share a commitment to excellence, yet each brings something unique to the gathering.

Green Mountain Coffee®

A great tasting cup of coffee can give you a whole new perspective. It’s a moment to pause, reflect, and reprioritize. That moment is what inspires us to make coffee that benefits everyone it touches. From carefully sourcing and roasting the highest quality beans, to supporting small farms and protecting the environment, we focus on what’s important. That’s why we believe a good cup of coffee can change your day...but a great cup of coffee can help change the world.

Tully's®

Some professionals need to approach their jobs slowly and with a great deal of care. Like tightrope walkers. Or brain surgeons.

At Tully's®, the same holds true for creating great coffee. It takes a lot of patience, which is why we roast our coffee beans to gently coax out the complex flavors and aromas. We take our time in roasting and in training each master roaster in our artisanal approach. From the aroma to the full-bodied flavor, you can taste the time taken in every satisfying cup of Tully's® coffee. Now we invite you to take your time discovering it.

The Original Donut Shop™

Some people won't admit it, but the best part of a donut is the coffee that goes with it. Without coffee, donuts are just another confection. But The Original Donut Shop™ Coffee? That's a different story. The Original Donut Shop™ Coffee lingers on your tongue and warms the soul. It brightens your day like a big scoop of sprinkles. And who doesn't like sprinkles? If you go through life as if it's a sweet surprise filled with jelly and covered in frosting, The Original Donut Shop™ Coffee is for you.

With over 20 gourmet coffee varieties in our portfolio, there are always opportunities to grow our Bolt™ pack variety options.
