Before You Brew

1. plug & power

Remove packing tape and cardboard from brewer. plug into a grounded outlet. press the power button (note the power button will not illuminate). The add water indicator will flash blue.

2. fill & place

Add 1 cup (8oz.) of water into a mug. lift the water reservoir lid and pour the water into the reservoir. Lower the lid and place your mug on the drip tray base.

NOTE: Do not add water to the reservoir if the brewer handle is up.

NOTE: Do not use distilled water.

3. lift & lower

The handle indicator will flash blue. Lift the handle. Water will drain from the water reservoir into the brewer. Once the water has fully drained, lower the handle. Do not insert a K-Cup® pod.

NOTE: If you add more than 10 oz. of water, the excess water will drain into the drip tray.

Brew your first cup

5. fill & place

Add desired amount of water into a mug (6oz. minimum, 10oz. maximum). Lift the water reservoir lid and pour the water into the reservoir. Lower the lid and place your mug on the drip tray base.

NOTE: To use a taller mug, remove the drip tray.

NOTE: Do not add water to the reservoir if the brewer handle is up.

6. lift & insert

The handle indicator will flash blue. Lift the handle. Water will drain from the water reservoir into the brewer. Once the water has fully drained, place a K-Cup® pod in the K-Cup® pod holder. Lower the handle completely to close the lid.

Do not remove the foil lid on the K-Cup® pod. High altitude brewing: While holding the brewer handle up, push down slowly on the K-Cup® pod in the pod holder until the bottom of the K-Cup® pod is punctured by the exit needle.

Brewer Features

Auto Off: Automatically powers off 90 seconds after the last brew for energy savings. Press the power button to reset.

Cord storage: makes transporting your brewers convenient and keeps counter tidy.

Brew & Enjoy

Press the BREW button when it starts flashing blue. During the brew process, the BREW button will flash red to indicate that the water is heating. After about 2 minutes the BREW button will turn solid red when the brewing process is complete. Lift the handle and dispose of the used K-Cup® pod.

CAUTION: While brewing, there is extremely hot water in the K-Cup® pod holder. To avoid injury, do not lift the handle during the brewing process.

Caring for your Brewer

Regular cleaning keeps your brewer running smoothly. Always be sure to turn off and unplug your brewer before cleaning.

Descaling your Brewer

Descaling your Keurig® brewer is easy, a few times a year. Properly follow the descaling procedures.

Deposits on the coffee maker as a result of mineral or other build-up over time can affect the overall performance of the brewer. Proper descaling of the brewer may also help ensure you avoid scale build-up in other areas of your Keurig® brewer. Refer to support.Keurig.com for video instructions on cleaning the entrance/exit needles.

You should descale your brewer every 3-6 months. Properly follow the descaling procedure.

1. Make sure your brewer is turned off, unplugged, and you have removed all the current K-Cup® pods.

2. Place a large ceramic mug on the drip tray plate.

3. With the brewer in the derescaled state, press and hold the BREW button for 3 minutes to derescale the brewer.

4. After derescaling, discard the contents of the drip tray into sink.

Helpful Hints

Water quality varies greatly. If you notice an unacceptable flavor in your beverage (such as chlorine or mineral tastes), we recommend using bottled or filtered water. Do not use distilled water.

Service

Beyond these recommended cleaning and maintenance procedures, if you notice any residual taste in your beverage, please refer to the Warranty section of the guide for more information.

Storage

Empty the internal hot water tank and water reservoir before storing or transporting. To empty the internal hot water tank, turn your Keurig® brewer off and press the button to release the water. Place a mug on the drip tray. Press and hold the BREW button and continue to hold until all of the water has drained into the mug. There will be a 1 to 2 second delay before the water begins to drain.

Store your brewer in a safe and frost-free environment. Keep the rinse cycle at your Keurig® brewer. Do not use distilled water, do not use bottled water, do not use any hard water.
