Get the most from your new Keurig® brewer
Before You Brew

1 Plug & Place
Remove packing tape from brewer and plug into a grounded outlet.

Place a large mug (12oz minimum) on the drip tray plate.

2 Rinse & Fill
Remove the water reservoir lid, then lift the reservoir straight up to remove it.

If you have a Keurig® Water Filter, install it now. Refer to your Water Filter Starter Kit for instructions.

Rinse reservoir with fresh water and fill to the MAX fill line.

Replace water reservoir, making sure the lock tab engages with the brewer. Replace lid.

NOTE: Do not use distilled water.

3 Power On
Press power button — the green power light will illuminate.

The brewer will automatically begin heating the water. This will take about 3 minutes. Once the heating sound stops, the brewer is ready.

4 Cleansing Brew
Do not insert a K-Cup® pod. Press the HOT WATER button. The five brew buttons will blink. Press the small mug (8oz) button to start a cleansing brew. Pour the hot water into the sink.

The one-time setup process is now complete and you are ready to brew!

NOTE: Between brew cycles, the brewer may take about a minute to reheat.

Brew Your First Cup

5 Place Mug & Pod
Place a mug on the drip tray plate. If using a travel mug, remove the drip tray and place the mug on the drip tray base. Lift the handle and place a K-Cup® pod in the K-Cup® pod holder. Lower the handle completely to close the lid.

Do not remove the foil lid on the K-Cup® pod.

High Altitude Brewing: While holding the brewer handle up, push down slowly on the K-Cup® pod in the pod holder until the bottom of the K-Cup® pod is punctured by the exit needle.

6 Brew & Enjoy!
Select your brew size — for bolder coffee, press the STRONG button before selecting your brew size. The brew size and STRONG button, if selected, will remain illuminated while brewing — about 1 minute.

For iced beverages, fill a 16oz plastic tumbler with ice. Insert any K-Cup® pod, then press the ICED button.

The brewer will be ready to brew another cup in about a minute.

NOTE: For iced beverages, only use a plastic cup. Do not use glass.

CAUTION: While brewing, there is extremely hot water in the K-Cup® pod holder. To avoid injury, do not lift the handle during the brewing process.

Brewer Features

Strong Brew increases the strength and bold taste of your coffee’s flavor. For bolder coffee, press the STRONG button and select your brew size.

Iced Coffee: Brew hot over ice and enjoy cold. Makes full-flavored and delicious iced coffee.

Hot Water on demand for instant soups and oatmeal.

Smart Start heats then brews in one simple process. No need to wait for the brewer to heat before selecting your brew size. Power on your brewer, place mug, insert a K-Cup® pod, and lower the handle. Then, select your brew size. The brewer will heat, then automatically begin brewing.

Programming: Press the settings button and use the arrows to program settings.

Clock: To use Auto On feature, set the time.

Temperature Control allows you to adjust the temperature from 187° – 192°.

Auto On sets your brewer to turn on at a specific time. When enabled, a sun icon will appear on the display screen.

Auto Off automatically turns your brewer off 2 hours after the last brew for energy savings. You can also program your brewer to shut off in 15 minute increments after your last brew. A moon icon will appear on the display screen when Auto Off is enabled.

High Altitude: To ensure your brewer works properly at higher altitudes (5,000 feet), enable the High Altitude setting in the settings menu. When enabled, a mountain icon will appear on the display screen.
Caring for your Brewer

Regular cleaning keeps your brewer running smoothly. Always be sure to turn off and unplug your brewer before cleaning.

**Brewer Exterior**

Keep your Keurig® brewer looking its best by cleaning the exterior from time to time. Just clean with a damp, soapy, lint-free, non-abrasive cloth. Never immerse the brewer in water or other liquids.

**Drip Tray**

The drip tray can hold up to 8 ounces of overflow and should be emptied and cleaned occasionally. To remove, slide it toward you, keeping it level to avoid spilling. Clean with a damp, soapy, lint-free, non-abrasive cloth.

**K-Cup® Pod Holder**

To remove the K-Cup® pod holder from the brewer, lift the handle and grasp the top of the K-Cup® pod holder with one hand while pushing up on the bottom of the K-Cup® pod holder from underneath with the other until it releases. After cleaning, align the K-Cup® pod holder with the opening using the two front ribs as a guide and snap into place from the top.

**Water Reservoir & Reservoir Lid**

The water reservoir lid and water reservoir should be cleaned periodically with a damp, soapy, non-abrasive cloth. Rinse the reservoir thoroughly after cleaning. This will ensure that no cleaning solutions remain in the area as they may contaminate the water supply. After rinsing, fill the reservoir with clean water and return it to the brewer. Do not dry the inside of the water reservoir with a cloth as lint may remain. The water reservoir lid and water reservoir should not be put into the dishwasher.

**CAUTION:** There are sharp needles that puncture the K-Cup® pod above the K-Cup® pod holder and in the bottom of the K-Cup® pod holder. To avoid risk of injury, do not put your fingers in the K-Cup® pod holder.

**Funnel**

The funnel can be removed from the K-Cup® pod holder by pulling on it until it pops off. To replace it, orient the snaps to the indent and just snap it back onto the K-Cup® pod holder.

**Exit Needle**

Remove the pod holder assembly and detach the funnel. Locate the exit needle on the inside bottom of the K-Cup® pod holder. Insert a straightened paper clip into the exit needle to loosen any coffee grounds.

**Entrance Needle**

Lift the brewer handle and locate the entrance needle on the underside of the lid. To clean all three holes in the needle, hold the brewer handle in the upward position and with your other hand, carefully insert a straightened paper clip into all three holes. Gently move it around to loosen any coffee grounds. Lower the handle completely and run two water-only brew cycles. Do not insert a K-Cup® pod.

**NOTE:** If you are using a water filter inside the water reservoir, remove it before cleaning.

**TIP:** Refer to support.Keurig.com for video instructions on cleaning the entrance/exit needles.
**Troubleshooting**

**Grounds in Your Coffee**

Grounds may have gathered in the exit or entrance needles and can be cleaned using a straightened paper clip or similar tool.

- Clean the exit needle of the K-Cup® pod holder. Refer to the Exit Needle care instructions.
- Clean the brewer entrance needle. Refer to the Entrance Needle care instructions.

**Brewer Will Not Brew**

- After placing the K-Cup® pod in the K-Cup® pod holder, make sure that the handle is pushed down securely and the brew buttons are flashing.
- If the add water light is illuminated, add water to water reservoir. Fill to and not beyond the MAX fill line. Make sure the water reservoir is seated properly in its base. If the add water light continues to be illuminated even after refilling, contact Customer Service.
- If 4, 6, 8, 10, 12oz, and ICED button lights are all on simultaneously, lift handle and remove K-Cup® pod (if present in the brewer). Close handle and place a large mug on the drip tray. Press the power button once. The brewer may dispense hot water.
- If 4, 6, 8, 10, 12oz lights all blink simultaneously, contact Customer Service.

**Brewing a Partial Cup**

- The exit needle may be clogged. Refer to the Exit Needle care instructions.
- The water reservoir may have been removed during brewing. Replace the water reservoir and perform a rinsing brew without a K-Cup® pod.
- The brewer may need to be descaled. If you have repeated the descale procedure on your brewer two times and it is still only brewing a partial cup, contact Customer Service.

**Brewer Does Not Have Power or Shuts Off**

- Make sure that the power button has been turned on.
- Plug brewer into its own grounded outlet. If the electric circuit is overloaded with other appliances, your brewer may not function properly. The brewer should be operated on its own circuit, separate from other appliances.
- For energy savings, your brewer is set to turn off automatically 2 hours after your last brew. You can program your brewer to automatically turn off in 15 minute increments by adjusting the settings.
- If the brewer still doesn’t have power, contact Customer Service.
LIMITED ONE YEAR WARRANTY

Keurig Green Mountain, Inc. (Keurig) warrants that your brewer will be free of defects in materials or workmanship under normal home use for one year from the date of purchase. It is recommended that you register your brewer on keurig.com/new so that your purchase information will be stored in our system. Keurig will, at its option, repair or replace a defective brewer without charge upon its receipt of proof of the date of purchase. If a replacement brewer is necessary to service this warranty, the replacement brewer may be new or reconditioned. If a replacement brewer is sent, a new limited one year warranty will be applied to the replacement brewer.

This warranty only applies to brewers operated in the United States and Canada. This warranty gives you specific legal rights, and you may also have other rights that vary from state to state and, in the case of Canada, from province to province.

Only the use of Keurig® K-Cup® brand pods and accessories will guarantee the proper functioning and lifetime of your Keurig® brewer. Any damage to or malfunction of your brewer resulting from the use of non-Keurig® pods and accessories may not be covered by this warranty or may result in a service fee if the damage or malfunction is determined to be caused by such use.

WHAT IS NOT COVERED BY THE LIMITED WARRANTY?

This warranty does not cover consequential or incidental damages such as property damage and does not cover incidental costs and expenses resulting from any breach of this warranty, even if foreseeable. Some states or provinces do not allow the exclusion or limitations of incidental or consequential damages, so the above limitation or exclusion may not apply to you depending on the state or province of purchase.

Nor does this warranty cover damages caused by use of non-Keurig® pods or accessories, services performed by anyone other than Keurig or its authorized service providers, use of parts other than genuine Keurig® parts, or external causes such as abuse, misuse, inappropriate power supply, or acts of God.

OTHER LIMITATIONS

This warranty is exclusive and is in lieu of any other express warranty, whether written or oral. In addition, Keurig hereby specifically disclaims all other warranties with respect to your K-ELITE™ BREWER, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. Some states or provinces do not allow disclaimers of such implied warranties or limitations on how long an implied warranty lasts, so the above limitation may not apply to you depending on the state or the province of purchase.

HOW DO YOU OBTAIN WARRANTY SERVICE?

Keurig® brewers are high-quality appliances and, with proper care, are intended to provide years of satisfying performance. However, should the need arise for warranty servicing, simply call Keurig Customer Service at our toll free phone number 1.866.901.BREW (2739). Please do not return your brewer for servicing without first speaking to Keurig Customer Service to obtain a Return Materials Authorization (RMA) number. Keurig® brewers returned without a RMA number will be returned to the sender without servicing.

Helpful Hints

Water quality varies greatly. If you notice an undesirable taste in your beverage (such as chlorine or mineral tastes), we recommend using bottled or filtered water. Do not use distilled water. You can also install a Keurig® Water Filter to help remove water impurities and improve beverage taste.

Service

Beyond these recommended cleaning and maintenance procedures, this brewer is not user serviceable. For service, please refer to the Warranty section of this guide.

Storage

Empty the water reservoir before storing or transporting and take care to ensure that you store your brewer in a safe and frost free environment. Please be sure to store your brewer in its upright position to avoid water leakage from the inner tank. If you store the brewer in a cold environment, you run the risk of water freezing inside the brewer and causing damage. When you prepare to use it after storage, we recommend rinsing the water reservoir with fresh water and running three rinsing brews without a K-Cup® pod.

If you plan to move your brewer to a different location, turn the brewer off, unplug it, and empty the water reservoir. If your brewer has been in an environment below freezing, please be sure to let it warm to room temperature for at least 2 hours before using.
